

STRUCTURAL STEEL FAB

Our design and engineer team works closely with our customers to assure them that every possible detail from pipe outfitting to electrical outfitting can be completed at our facility before transporting. Our ability to build and transport large, complete and outfitted structures for all types of industries has made us the premier choice when our customers are looking to cut assembly cost in house. With full crane, rigging and transportation support, FTI has built and transported large structures over 120 feet in length, and over 225 ton for companies such as NASSCO, SPAWAR, Cryoquip and many more.

Complete Engine Compartments for Ships

Exhaust towers for ships

Cold box towers for Cryogenics

Barge spuds

WSTTT project

Ship Mast

Life Boat Davits

King Post

And Much, Much More!
