# COMMITMENT TO SUSTAINABILITY

FTI has employed skilled planners, scientists, architects, engineers and construction managers, in our sustainability practices, including strong Leadership in Energy and Environmental Design on projects that have required such professionals and expertise.

FTI is committed to business practices, operations and projects that improve economic, environmental and societal outcomes. Our comprehensive skills and expertise are a valued resource to clients around the world, in support of their sustainability objectives. Internally, FTI'S sustainability practices are being continuously enhanced to minimize the Company's environmental footprint, reduce costs and enrich the work experience of our employees.

Underpinning FTI'S sustainability principles are the Company's core business values:

- An uncompromising commitment to ethical behavior.

- An uncompromising commitment to safety.

- An uncompromising commitment to technical excellence.

- An uncompromising commitment to a collaborative and inclusive work environment

- An uncompromising commitment to the professional development of our staff.
