

## HISTORY

For over 40 years Fabrication Technologies Industries Inc. has been in the steel fabricating and welding business specializing in welding all types of alloys, such as carbon steel, stainless steel, copper nickel and aluminum to name a few.

FTI has the unique capabilities to perform custom steel fabrication to the customer's needs in any shape or size. FTI's capabilities range from prototyping to high volume production runs.

FTI's new location facilitates competitive pricing and the ability to service clients worldwide. FTI is fully equipped with a complete:

- Weld and Fabrication Shop
- Machine Shop
- Pressure Vessel – Tank and Pipe Shop
- Sandblast and Painting Department

The new location is designed and structured to accommodate the company's continued growth and development.

When 40 years of growth took the company to new levels our management systems evolved to accommodate the needs of fortune 500 and multi-national corporations; while maintaining relationships with the Department of Defense, Shipbuilding, Utilities, government agencies, and new product developers.

As an outstanding performer in the fabrication industry, FTI is sure to be a valued supplier to your operations. We are committed to excellence and welcome the opportunity to earn your business.
